

Contents of Volume 37

Number 1, February 2004

Luis Alberto Carvalho. A simple and effective algorithm for detection of arbitrary Hartmann–Shack patterns	1
Axel Wismüller, Anke Meyer-Bäse, Oliver Lange, Dorothee Auer, Maximilian F. Reiser, and DeWitt Sumners. Model-free functional MRI analysis based on unsupervised clustering	10
Brian E. Chapman, Dennis L. Parker, Janet O. Stapelton, Jay S. Tsuruda, Claudia Mello-Thoms, Bronwin Hamilton, Gregory L. Katzman, and Kevin Moore. Diagnostic fidelity of the Z-buffer segmentation algorithm: preliminary assessment based on intracranial aneurysm detection	19
F. Martin-Sanchez, I. Iakovidis, S. Nørager, V. Maojo, P. de Groen, J. Van der Lei, T. Jones, K. Abraham-Fuchs, R. Apweiler, A. Babic, R. Baud, V. Breton, P. Cinquin, P. Doupi, M. Dugas, R. Eils, R. Engelbrecht, P. Ghazal, P. Jehenson, C. Kulikowski, K. Lampe, G. De Moor, S. Orphanoudakis, N. Rossing, B. Sarachan, A. Sousa, G. Spekowius, G. Thireos, G. Zahlmann, J. Zvárová, I. Hermosilla, and F.J. Vicente. Synergy between medical informatics and bioinformatics: facilitating genomic medicine for future health care	30
Andrey Rzhetsky, Ivan Iossifov, Tomohiro Koike, Michael Krauthammer, Pauline Kra, Mitzi Morris, Hong Yu, Pablo Ariel Duboué, Wubin Weng, W. John Wilbur, Vasileios Hatzivassiloglou, and Carol Friedman. GeneWays: a system for extracting, analyzing, visualizing, and integrating molecular pathway data	43
<i>Book Review</i>	
Paul Pavlidis. Molecular computing	54
<i>Methodological Review</i>	
Andre W. Kushniruk and Vimla L. Patel. Cognitive and usability engineering methods for the evaluation of clinical information systems	56

Number 2, April 2004

Jorge E. Caviedes and James J. Cimino. Towards the development of a conceptual distance metric for the UMLS	77
Paul R. Falzer. Cognitive schema and naturalistic decision making in evidence-based practices.....	86
Santiago Aja-Fernández, Rodrigo de Luis-García, Miguel Ángel Martín-Fernández, and Carlos Alberola-López. A computational TW3 classifier for skeletal maturity assessment. A <i>Computing with Words</i> approach.....	99
Ida Sim, Ben Olasov, and Simona Carini. An ontology of randomized controlled trials for evidence-based practice: content specification and evaluation using the competency decomposition method	108
Wendy W. Chapman, John N. Dowling, and Michael M. Wagner. Fever detection from free-text clinical records for biosurveillance	120
<i>Methodological Review</i>	
Wanda Pratt, Madhu C. Reddy, David W. McDonald, Peter Tarczy-Hornoch, and John H. Gennari. Incorporating ideas from computer-supported cooperative work	128

Numbers 3, June 2004

Donald Gardner. Using genomics to help predict drug interactions	139
Aziz A. Boxwala, Mor Peleg, Samson Tu, Omolola Ogunyemi, Qing T. Zeng, Dongwen Wang, Vimla L. Patel, Robert A. Greenes, and Edward H. Shortliffe. GLIF3: a representation format for sharable computer-interpretable clinical practice guidelines.....	147
Yao Sun. Methods for automated concept mapping between medical databases.....	162
Bradley Malin and Latanya Sweeney. How (not) to protect genomic data privacy in a distributed network: using trail re-identification to evaluate and design anonymity protection systems	179
Jiajie Zhang, Vimla L. Patel, Todd R. Johnson, and Edward H. Shortliffe. A cognitive taxonomy of medical errors	193
<i>Methodological Review</i>	
K.A. Karasavvas, R. Baldock, and A. Burger. Bioinformatics integration and agent technology	205

Number 4, August 2004

Special Issue Biomedical Machine Learning

Guest Editor: Lucila Ohno-Machado

Guest Editorial

Lucila Ohno-Machado. Research on machine learning issues in biomedical informatics modeling	221
---	-----

Special Issue Articles

Predrag Radivojac, Nitesh V. Chawla, A. Keith Dunker, Zoran Obradovic. Classification and knowledge discovery in protein databases	224
Fei Pan, Baoying Wang, Xin Hu, William Perrizo. Comprehensive vertical sample-based KNN/LSVM classification for gene expression analysis	240
Xiaobo Zhou, Kuang-Yu Liu, Stephen T.C. Wong. Cancer classification and prediction using logistic regression with Bayesian gene selection	249
Ju Han Kim, Dooil Jeoung, Seongeun Lee, Hyeouneui Kim. Discovering significant and interpretable patterns from multifactorial DNA microarray data with poor replication	260
Dragan Gamberger, Nada Lavrač, Filip Železný, Jakub Tolar. Induction of comprehensible models for gene expression datasets by subgroup discovery methodology	269
Richard Butterworth, Dan A. Simovici, Gustavo S. Santos, Lucila Ohno-Machado. A greedy algorithm for supervised discretization	285

Methodological Review

Winston Patrick Kuo, Eun-Young Kim, Jeff Trimarchi, Tor-Kristian Jenssen, Staal A. Vinterbo, Lucila Ohno-Machado. A primer on gene expression and microarrays for machine learning researchers	293
--	-----

Number 5, October 2004

Dongwen Wang, Mor Peleg, Samson W. Tu, Aziz A. Boxwala, Omolola Ogunyemi, Qing Zeng, Robert A. Greenes, Vimla L. Patel, and Edward H. Shortliffe. Design and implementation of the GLIF3 guideline execution engine	305
Roy Rada and Scott Finley. The aging of a clinical information system	319

Yuval Shahr, Ohad Young, Erez Shalom, Maya Galperin, Alon Mayaffit, Robert Moskovitch, and Alon Hessing. A framework for a distributed, hybrid, multiple-ontology clinical-guideline library, and automated guideline-support tools	325
Kevin Y. Yip, David W. Cheung, Michael K. Ng, and Kei-Hoi Cheung. Identifying projected clusters from gene expression profiles	345
Qihua Tan, Klaus Brusgaard, Torben A. Kruse, Edward Oakeley, Brian Hemmings, Henning Beck-Nielsen, Lars Hansen, and Michael Gaster. Correspondence analysis of microarray time-course data in case-control design	358
R.L. Somorjai, B. Dolenko, A. Demko, M. Mandelzweig, A.E. Nikulin, R. Baumgartner, and N.J. Pizzi. Mapping high-dimensional data onto a relative distance plane—an exact method for visualizing and characterizing high-dimensional patterns	366
<i>Methodological Review</i>	
Tim W. Nattkemper. Multivariate image analysis in biomedicine	380

Number 6, December 2004

Special Issue

Named Entity Recognition in Biomedicine

Guest Editors: Sophia Ananiadou, Carol Friedman, Jun'ichi Tsujii

Guest Editorial

Sophia Ananiadou, Carol Friedman, Jun'ichi Tsujii. Introduction: named entity recognition in biomedicine	393
--	-----

Special Issue Articles

Alexander A. Morgan, Lynette Hirschman, Marc Colosimo, Alexander S. Yeh, Jeff B. Colombe. Gene name identification and normalization using a model organism database	396
Jie Zhang, Dan Shen, Guodong Zhou, Jian Su, Chew-Lim Tan. Enhancing HMM-based biomedical named entity recognition by studying special phenomena	411
Nigel Collier, Koichi Takeuchi. Comparison of character-level and part of speech features for name recognition in biomedical texts	423
Ki-Joong Lee, Young-Sook Hwang, Seonho Kim, Hae-Chang Rim. Biomedical named entity recognition using two-phase model based on SVMs	436
Wen-Juan Hou, Hsin-Hsi Chen. Enhancing performance of protein and gene name recognizers with filtering and integration strategies	448
Yoshimasa Tsuruoka, Jun'ichi Tsujii. Improving the performance of dictionary-based approaches in protein name recognition	461
Kaoru Yamamoto, Taku Kudo, Akihiko Konagaya, Yuji Matsumoto. Use of morphological analysis in protein name recognition	471
Irena Spasić, Sophia Ananiadou. Using automatically learnt verb selectional preferences for classification of biomedical terms	483
Manabu Torii, Sachin Kamboj, K. Vijay-Shanker. Using name-internal and contextual features to classify biological terms	498

Methodological Review

Michael Krauthammer, Goran Nenadic. Term identification in the biomedical literature	512
<i>Author Index for Volume 37</i>	527
